

I want to watch Highland's Church's Sunday services or Weekly Video Teachings for adults, children or youth...

On my computer or iPad:

- Go to www.highlandcommunitychurch.com and click on the graphic that says "Live Sunday Service" or "Weekly Teachings". You may have one more title link to click on depending on which teaching you are going to watch.

On my smartphone: (make sure you have the latest phone updates)

- Best: Download the Highland Community Church app (iOS, Android) and click the "Live Sunday Service" or the "Weekly Teachings" pictures on the home page. If you have the App already be sure to hit the refresh button when you open it. If you are new to the App please say yes to signing up for notifications even when the App is not open so that you get our updates sent to you.
- Great: Browse to highlandcommunitychurch.com on your internet and click on the graphic that says "Live Sunday Service" or "Weekly Teachings".
- Good: Download the Vimeo App and search for Highland Community Church.

On my TV:

- If available, you can connect a computer to a TV that has an HDMI connection port using an HDMI cord. Smart TV's may have other options for you but those will depend on TV model as well as computer type and abilities. Keep in mind that if you have slower speed internet that the video can be degraded/blurry on a TV more than on a computer, ipad, or smartphone screen.
